

PROJECT REPORT

1.Introduction :

1.1 Over view :

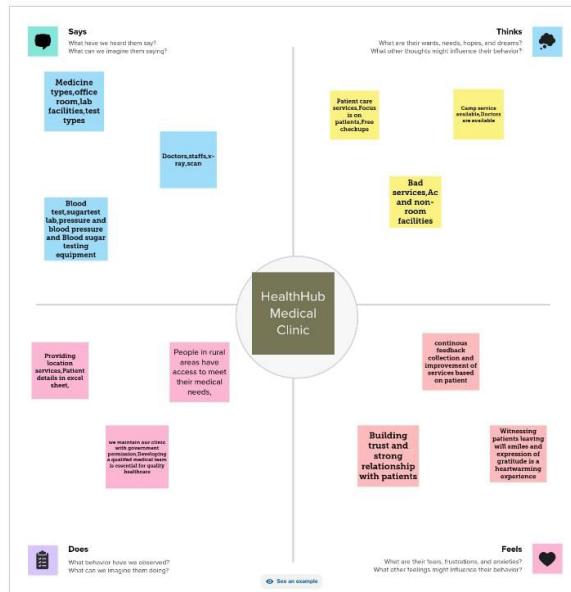

Health Hub means an interactive health and wellness assessment centre We have set up at various locations in Australia, which provides an assessment of a user's health status.

1.2 Purpose:

Health hubs often offer a range of services, including primary care, specialty care, diagnostic tests, wellness programs, mental health services, and educational resources. They can also provide patients with access to a network of healthcare providers, making it easier to coordinate care and improve health outcomes.

Advantages :-

A clinic is smaller than a hospital where patients are less sick and do not stay overnight. You should schedule an appointment to visit your doctor at the clinic. Some reasons to go to a clinic or Doctor's

office to see your Primary Care Provider/Doctor are: Routine medical appointments.

Disadvantages :-

There can be technical problems with the equipment used for telemedicine. Telemedicine may not be available to all patients due to limited access to technology.

There may be inequitable access to telemedicine if it is only available to patients who can afford it .

6 CONCUSSION

Inadequate healthcare is prevalent globally in all countries, and no country has a perfect healthcare system. Health is a basic human right, and improvements in healthcare should be a goal of every country.

7 FUTURE SCOPE

The next wave of care emphasizes wellness and preventive medicine, rather than primarily

treating and curing problems after they've arisen. This focus will allow clinicians to provide more personalized care plans, making it easier to diagnose rapidly and apply precision care when illness does occur.
